KINGSBURG HEALTHCARE DISTRICT

Motto:

"Get Up, Get Out, Get Healthy!"

Our Vision:

We want our district to be healthy, safe and well, long before a crisis arrives. By working at the grassroots level, the Kingsburg Healthcare District seeks to build a stronger, healthier, and more connected community for today and for generations to come.

Our Mission:

Funding initiatives that further the health, safety, and welfare of our district residents. We do this by providing grants and partnerships with qualified nonprofit organizations, schools, public agencies, and community service providers.

History:

We honor the District's legacy as the former owner and operator of Kingsburg's local hospital by ensuring this valued community asset continues to fulfill a vital healthcare role. Today, the former hospital campus is leased to Crestwood, which operates it as a mental health rehabilitation facility. Crestwood's significant investment in the building and grounds has preserved and revitalized the property while expanding access to essential behavioral health services. The district also partners with Valley Health Team, having helped fund and equip the after-hours urgent care center at its Kingsburg location and continuing to support its successful operation each year.

Core Values:

Our motto "Get Up, Get Out, Get Healthy!" reflects the three pillars that guide our work. **Get Up** represents mental and emotional wellness, resilience, and the ability to help people overcome barriers to healthier lives. **Get Out** promotes physical activity, social connection, recreation, and active participation in our community. **Get Healthy** supports nutrition, preventive care, healthcare access, and the knowledge and resources people need to achieve lasting well-being.
