

Kingsburg Healthcare District

Vision Statement

“Get Up, Get Out, Get Healthy!”

Our Mission

The mission of the Kingsburg Healthcare District is to improve the health, independence, and quality of life of the residents we serve through responsible stewardship, strategic partnerships, and community-based investments. We are entrusted with approximately \$1 million in local tax revenue each year. We are committed to investing these public resources transparently and effectively in programs, facilities, and services which deliver meaningful health benefits for residents throughout our District.

We honor the District’s legacy as the former owner and operator of Kingsburg’s local hospital by ensuring this valued community asset continues to fulfill a vital healthcare role. Today, the former hospital campus is leased to Crestwood Behavioral Health, which operates it as a mental health rehabilitation facility. Crestwood’s significant investment in the building and grounds has preserved and revitalized this community landmark while expanding access to essential mental health services. The District also partners with Valley Health Team, having helped fund and equip VHT’s after-hours urgent care center in Kingsburg, and continuing to support that facility’s successful operation each year.

Our motto “Get Up, Get Out, Get Healthy!” reflects the three pillars which guide our work. **Get Up** represents mental and emotional wellness, resilience, and the ability to help people overcome barriers to healthier lives. **Get Out** promotes physical activity, social connection, recreation, and active participation within our community. **Get Healthy** supports nutrition, preventive care, healthcare access, and the knowledge and resources people need to achieve lasting well-being.

Through grants and partnerships with qualified nonprofit organizations, schools, public agencies, and community service providers, we support physical sports for youth, senior activities and meals, school athletics programs and improvements, KCAPS and other food-assistance efforts, public drinking-water fountains and other community health amenities, and we continue to support the work of our police, fire, ambulance, and paramedic services. Every investment is intended to advance the health and safety of our residents. By working at the grassroots level and also with well-established organizations, the Kingsburg Healthcare District continues to build a stronger, healthier, and more connected community for today, and for generations to come.
